

# Freya vs. Motivation

I applied to ICT with the main thought being, I need to start somewhere. In the end I want to *create something beautiful*, inside and out, *something timeless*.

I gain my happiness from solving problems and *achieving progress*. Society evolves and methods improve, this means there will always be something new to learn and for me *to be happy* doing what I love.

With ICT I do not only start the journey towards my dream job, which truth be told is still unclear, I also learn the basics. Learning is a process of trial and error, which starts somewhere and will inevitably end. But until then, I want to *keep creating*.

‘I need to start my dream somewhere. And if it isn't at the beginning of the end, it shall be from 0 to 1.’ - me

Quartile	Course	EC	Exam	Grade
1	Program-& Career Orientation	2.5	Assessment Website	
	Computer-Science Basics	5	Written Knowledge Test	
	Programming Basics	5	Case Study Exam

Strengths What do you do best? What are your positive traits?

Creative Thinking: I grew up in a naturally artistic family and the trait didn't skip out on me, because I enjoy drawing a lot in my spare time. This trait often gives me an authentic point of view and I find myself brainstorming on uncommon ideas.

To Anticipate: I relatively find it easy to find connections based on context. In other words I am quick to find a way to compromise and thus to solve problems. Maths has always been a strong subject of mine and although it's not necessary for ICT, it's a clear example that I'm good at problem solving. Another is a different hobby of mine being sailing. Being on a small sailboat, you need some quick thinking for every aspect of it.

To Adjust: I've come to know at my part-time job that I'm easy to adjust to my surroundings and work, since, working at a garden centre and its florist shop, I've been put on various tasks and multiple at a time, succeeding and finishing them.

Being Assertive at times in my case means taking initiative and listening to others attentively. It's showing when I'm working on projects
